

# **Session 2: Exercises**

**Mastering the Internet**  
**Duke OLLI Spring 2024**

**David Shamlin**

# Exercise: Bookmarks

- Type the URL for the course website in the Address Bar of a tab and then hit the enter/return/go key

<https://olli-shamlin.github.io/spring-2024/>

- Observe the star icon that appears on the right hand side of the Address Bar
- Click the star icon then click the “Done” button in the pop-up window that appears
- Observe a new item that appears below the “forward” & “back” buttons in the Address Bar. This is your bookmark.
- Observe that the star icon in the Address Bar has changed color. This indicates that you have bookmark for the URL in the Address Bar.
- Open a new Window or Tab and click your new bookmark  
Your browser will load the page of the bookmark’s URL

# Exercise: Settings: Theme Mode Setting

- Go to “more” > Settings > Appearance
- Find the “Mode” item; note the current setting of the list selector control
- Click the list selector control to choose a different setting

**Note: the iOS Chrome app does not directly include a setting for “theme mode”. Instead, the iOS Chrome app inherits your device’s mode setting.**

**To change your device’s “theme mode” go to**

**Settings > Display & Brightness.**

# Exercise: Settings: Font Size Setting

- If you are using a laptop
  - “more” > Settings > Appearance
  - Find the “Font size” item; note the current setting of the list selector control
  - Click the list selector control to choose a different setting
- If you are using an iPhone or iPad
  - “more” > Zoom Text...”
  - Note four controls appear at the top of the screen: “Reset”, “—”, “+”, and “Done”
  - Click the “+” or “—” to increase or decrease the font size
  - Click “Done” when you are content

# Exercise: Settings: “On Startup”

- Go to “more” > Settings > On Startup
- Click the “Continue where you left off” radio button
- Open 2-3 windows/tabs and load to a different page in each (e.g., wikipedia.org, amazon.com, and etsy.com)
- Quit your browser and then restart your browser; note how your browser now loads the 2-3 pages that were open when you quit your browser
- If you do not like this behavior, go to “more” > Settings > On Startup again and click the “Open the New Tab page” radio button

**Note: The “On Startup” setting is only available in the desktop/laptop version of Chrome. It is not available in the iPhone/iPad version.**

# Exercise: Cookies

1. Go to a shopping site that you are not logged into  
E.g., amazon.com, etsy.com, target.com, walmart.com, etc
2. Add 2-3 items to the cart
3. Quit & restart your browser
4. Return to the shopping site you chose and note the items you chose are still in the cart
5. Delete cookies
6. Open an incognito window and repeat steps 1 & 2

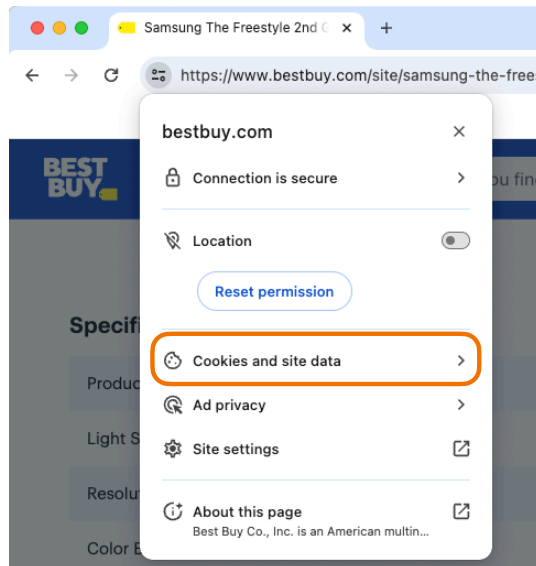

# Exercise: Cookies

## 5. Delete cookies

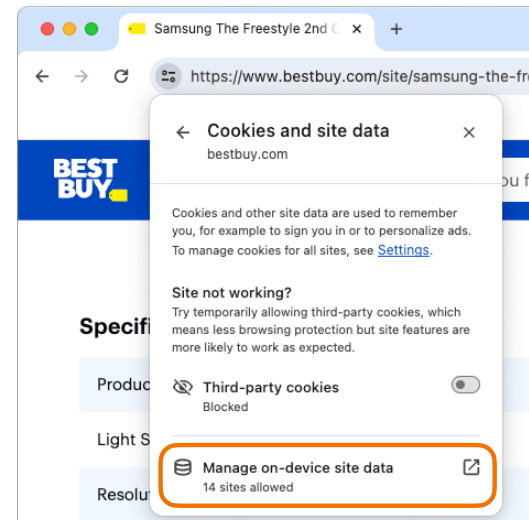

1. Click the “view site information” icon in the address bar to the left of the URL.

2. Click the “Cookies and site data” item

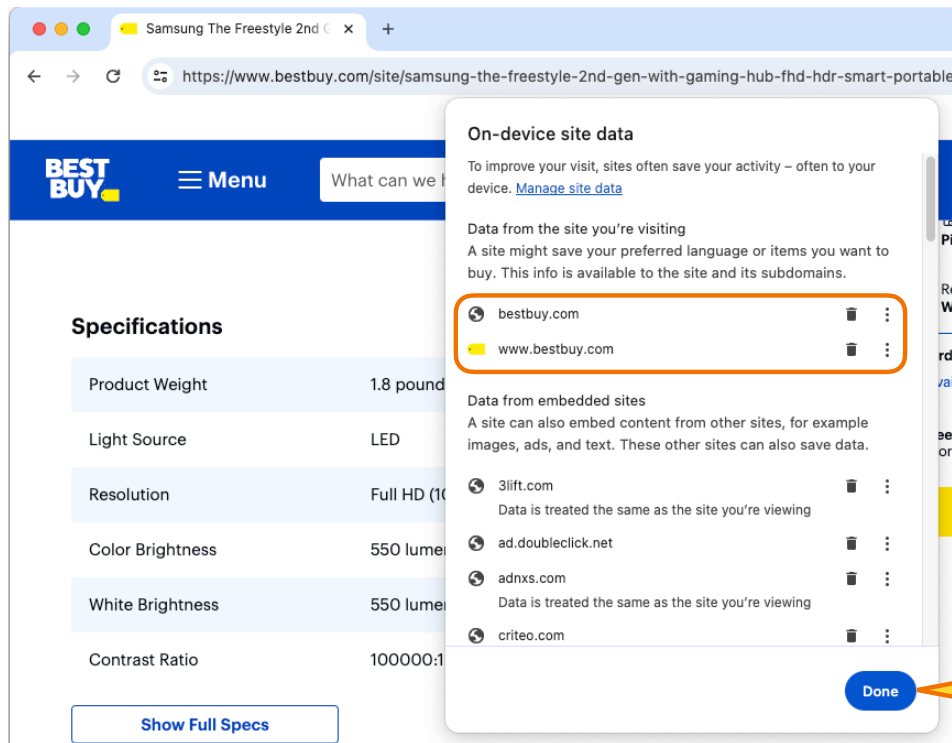

3. Click the “Manage on-device site data” item

# Exercise: Cookies

- Click the trash can icon beside each item in the “Data from the site you’re visiting” section. How many items you see here depends on the shopping site you are using. You should see at least one item.
- Click the “Done” button

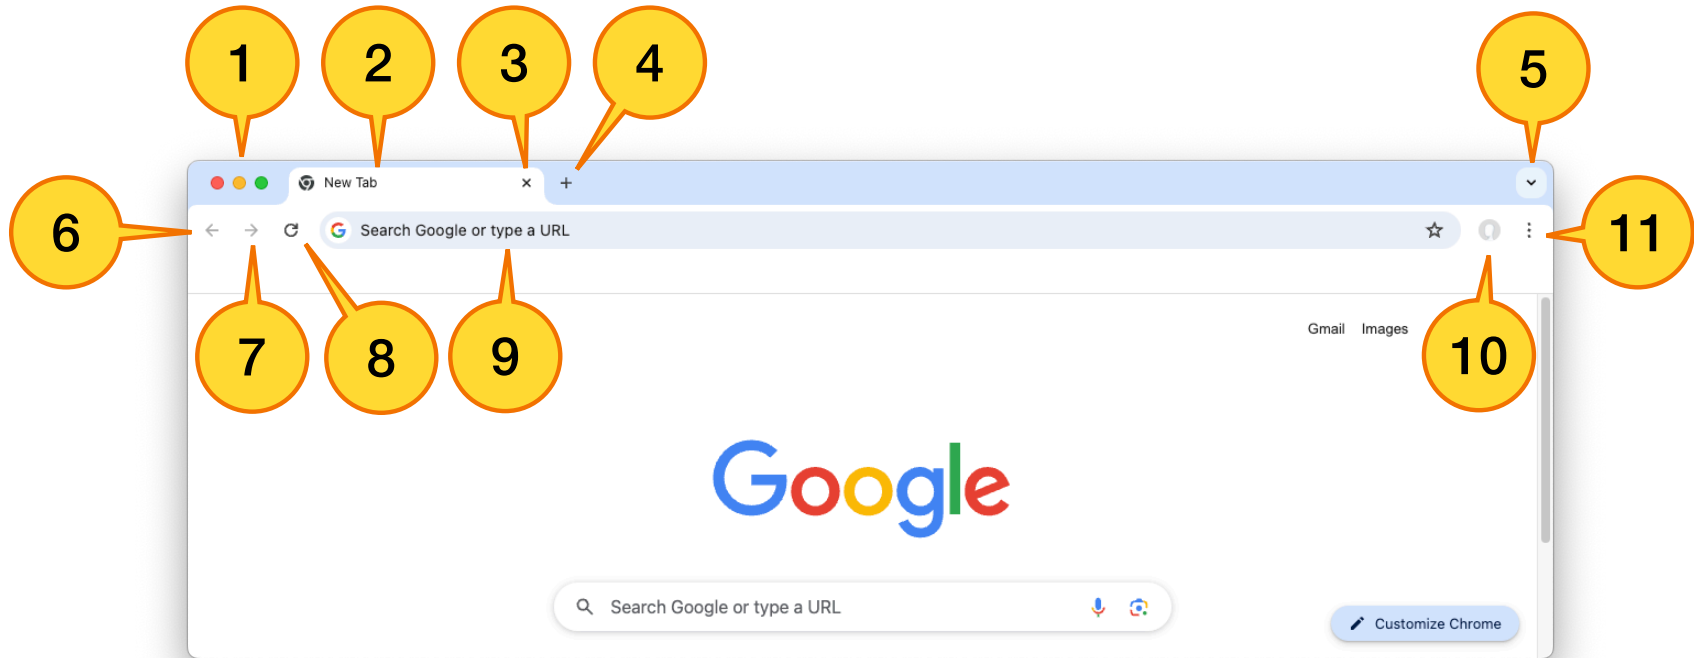

- Click the “Reload this page” icon found to the left of the Address Bar in browser Toolbar
- Note that the cart is now empty
- Open an Incognito window  
“More” > New Incognito Window”
- In the new Incognito window, return to your chosen shopping site and add 2-3 products to the cart
- Return to a “normal” window (ie, not an Incognito window)
- Enter the domain name of your shopping site and hit enter/return/go to load the shopping site’s home page
- Note that the cart in the “normal” window is empty
- Quit and restart your browser.
- Load your shopping site in a “normal” window  
Note that the cart is empty
- Load your shopping site in an Incognito window  
Note that the cart is empty there as well

# Chrome Toolbar Cheat Sheet

*See next slide for the key to the cheat sheet*

1	Window Controls	These three controls close, minimize, and maximize (a.k.a., “full screen mode”) the window. These controls appear on all windows not just Chrome windows.
2	Tab	Tabs allow you to have multiple pages at the same time and in a single browser window. Each open page appears as a "tab" at the top of your web browser window. You can click the tabs to switch between your open web pages.
3	Close Tab	Closes the associated tab. If the window only has one tab, closing the tab will also close the window.
4	New Tab	Creates a new tab in the window.
5	Tab History	Clicking on this icon opens a dialog window that allows you to search currently open tabs in the window and tabs recently closed in the window
6	Back	This icon lets you return to URLs/page you previously opened in the associated tab
7	Forward	This icon lets you return to URLs/page you previously opened in the associated tab
8	Refresh	Clicking this icon causes the tab’s current page to reload.
9	Address Bar	This element shows the URL of the currently loaded page. You can type a URL into the Address Bar to navigate to a site/page. If you enter something other than a URL in the Address Bar, your browser sends it to a search engine. Most browser address bars offer features like autocomplete and a list of suggestions while the address is being typed in. This auto-completion feature bases its suggestions on the browser's history.
10	“You”	Clicking this icon opens a dialog window that allows you to sign in to your Google account. Signing in to your Google account using this dialog allows to you to use Google’s Cloud features through your browser.
11	“More”	Clicking this icon opens the menu that gives you access to all of the Chrome browser’s features that are not accessible using the other controls/icons found in the Toolbar
